ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite):

The subject wetland is located in the NW1/4 of the NW1/4 of Section 20, Township 31 North, Range 22 West. It is an area inadvertently created by site grading and road construction in 1996. The site has some wetland vegetation, but lacks hydric soils. It is located in an area of Zimmerman fine sand and has no surface water connection to other wetland areas or tributary drainages. The site is isolated and has little or no potential to provide habitat for endangered species or migratory birds. There is no standing water that could be used for irrigation.
